

Bespoke Gates

Traditional Ironwork Gates And Post Kits For Automation

Traditionally styled ironwork gates featuring close fitting dog bars, double cross members with a decorative circular infill and heritage spearheads.

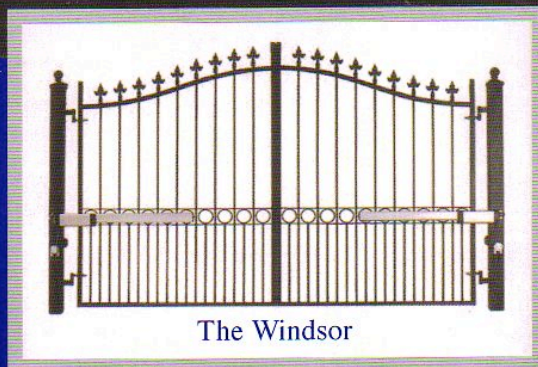

A classic design available in either arch top 'Windsor' or flat top 'Henley' designs to enhance and protect distinctive residents properties. The Bespoke range are galvanised and powder coated in black for a lasting finish.

Gate & Post Kits Ready For Automation

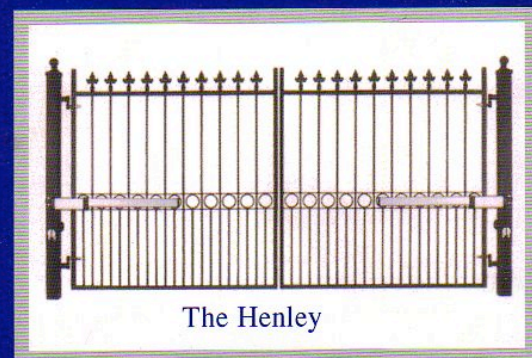

All brackets and automation fittings are works items, fitted in our workshop for the tidiest and most accurate finish. This system avoids any on site welding or cutting which can jeopardise the galvanising and finish of your gates. The uniform process guarantees a fixed and reliable standard

Bespoke Gates Are Available From Stock

You need not wait 4 to 8 weeks for a pair to be made. We have standard sizes to suit most entrances ready for delivery. Matching railing panels are also available. See inside for details.

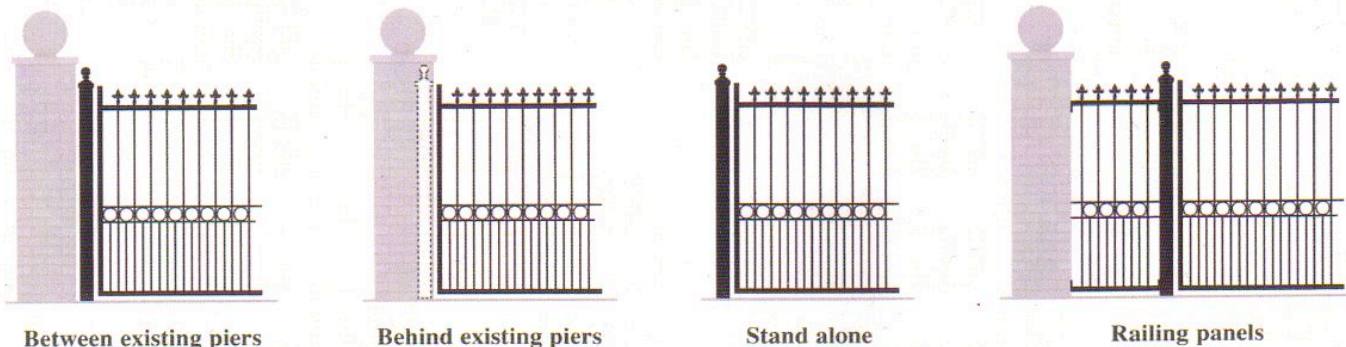

The Windsor

The Henley

The smartest and most straightforward solution to affordable automated gates

Gate and Post Kits will fit a variety of positions to suit your application:

This choice of layouts shown above gives great flexibility with the standard sizes available:

3000mm pair, 3200mm pair, 3600mm pair, 4000mm pair.

In addition, matching 595mm wide railing panels are available. These panels will span between the steel posts and existing brick or stone piers and can be cut down to suit specific gaps.

They are supplied with telescopic end brackets. (see diagram on opposite page)

Designed as a complete package of gates, posts and automation, this system can be installed with the minimum of disturbance to the site and will reduce the installation schedule considerably.

The Automation System

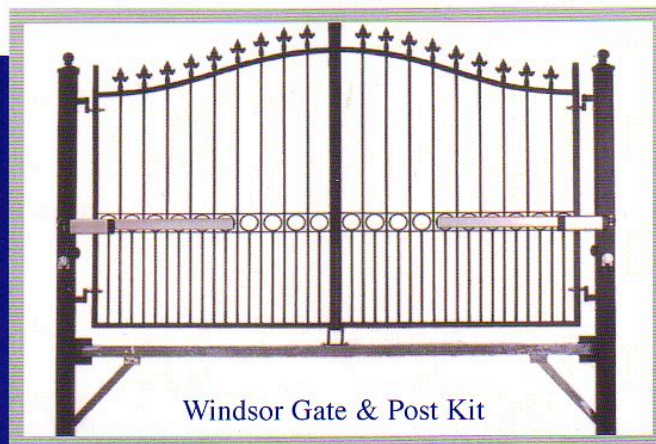

The gate operators and control equipment are manufactured by BFT.

Well established as a market leader in the UK for over 14 years, BFT have premises in the north and south of the UK and a nationwide network of agents.

All automation equipment carries a full 2 year warranty from BFT's UK base.

As with any quality automation system the control panel will allow operation of the gates with your selection of optional controls; Radio transmitters, Intercom systems, Entry pad etc... can be added to suit individual requirements.

This system allows gates to open to a maximum of 105 degrees.
